

Journeyman & Apprentice Electricians

Build More Than Just A Career

Our people are our success. They are also adventure-seekers and difference-makers who are committed to a shared vision – to offer the best of the best in project delivery services. When you join ONEC, you join a community that seeks to help you build more than just a career. You will build working relationships and partnerships that become friendships, build ideas that become realities and build skills that help you grow personally and professionally. We want you to love what you do so that together we can do great things.

About ONEC

ONEC Group has been building projects in Western Canada for over 20 years. As an EPC and EPCM provider, our services include multidisciplinary project services including project & construction management, engineering & design, procurement & logistics, geomatics & survey, fabrication & construction, mechanical & electrical installation, and scaffolding & insulation. We are the only mid-sized firm in our industry that offers this collective expertise under one roof. Because of our company's size, clients get to know our team and always work with the same people, resulting in stronger working relationships and efficiency. We are agile in our approach to project delivery because we are able to pivot quickly and adjust our standard processes to suit specific clients' needs. ONEC believes in local leadership and we engage top talent from the communities we work in. We understand that local knowledge and presence are key to not only our overall business success but the economic success of the communities we work in.

Position Summary

We are seeking Journeymen and Apprentice Electricians to support the coordination and oversee the successful implementation and completion of projects. The successful candidate will report to the Construction Services Manager.

Other responsibilities include:

- Electrical trouble shooting and problem solving.
- Following procedures as defined in the CEC (Canadian Electrical Code).
- Assembling, installing, testing, and maintaining electrical/ electronic wiring, equipment, appliances, apparatus, and fixtures, using hand tools and power tools.
- Diagnosing malfunctioning systems, apparatus, and components.
- Using test equipment and hand tools to locate the cause of a breakdown and correct the problem.
- Connecting wires to circuit breakers, transformers, or other components.
- Inspecting electrical systems, equipment, and components to identify hazards, defects, and the need for adjustment or repair, and to ensure compliance with codes.
- Advising management on whether continued operation of equipment could be hazardous.

- Testing electrical systems and continuity of circuits in electrical wiring, equipment, and fixtures, using testing devices such as ohmmeters, voltmeters, and oscilloscopes, to ensure compatibility and safety of system.
- Using a variety of tools and equipment such as power construction equipment, measuring devices, power tools, and testing equipment including oscilloscopes, ammeters, and test lamps.
- Installing ground leads and connecting power cables to equipment, such as motors.
- Repairing or replacing wiring, equipment, and fixtures using hand tools and power tools.
- Placing conduit (pipes or tubing) inside designated partitions, walls, or other concealed areas, and pulling insulated wires or cables through the conduit to complete circuits between boxes.
- Reading and interpreting electrical, mechanical, and architectural drawings and electrical code specifications to determine wiring layouts.
- Cutting, threading, bending, assembling, and installing conduits and other types of electrical conductor enclosures and fittings.
- Positioning, maintaining, and installing distribution and control equipment such as switches, relays, circuit breaker panels and fuse enclosures.
- Installing and maintaining fiber optic systems.
- Other duties as required.

Our Ideal Candidate

- Good understanding of the Canadian Electrical Code. FSR-B is an asset.
- Well organized, team player, strong interpersonal and customer service skills.
- May train apprentices.
- Certified Journeyman or Registered Apprentice Electrician.
- Holds a valid Alberta Journeyman Ticket or Red Seal Certification. Must be an Alberta-certified journeyman or someone who holds a recognized related trade certificate.
- 3 years or more experience in a similar role.
- Previous oil and construction industry experience
- Able to analyze problems and strategize for better solutions.
- Self-starter requiring minimal supervision with the ability to multitask and define properties.
- Strong communicator. Able to understand instructions and communicate effectively.
- Attention to detail and the ability to meet quality standards.
- CSTS 2020.
- WHMIS 2015.
- Must successfully complete pre-access drug and alcohol testing.
- Must present proof of double vaccination.

Application Instructions

ONEC Group is an equal opportunity employer. Positions are filled by means of open competition where the selection is based on job-related skills, training, experience, and suitability. Final candidates will be asked to provide references. The results of the reference check must be acceptable to ONEC Group. We also consider different experience levels and knowledge and candidates with less experience may be considered for lower-level positions.

We thank all applicants in advance however only individuals selected for interviews will be contacted.

ONEC Group accepts resumes via online application at <http://onecgroup.com/careers/> or via email at hr@onecgroup.com. Please only submit in Word format.
